PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Intelligent Systems, with a strong interest in Artificial Intelligence, particularly Large Language Models (LLMs), and their practical applications. Experienced as a full-stack web developer, working across frontend and backend development to build, enhance, and maintain web applications. Interested in combining AI and software development to create practical, user-focused solutions while continuously expanding technical skills through hands-on projects and collaborative work.

EDUCATION

BINUS University

Bachelor of Computer Science - Intelligent System

Selected for competitive Special Class (S-Class) in Computer Science at BINUS Kemanggis, receiving advanced weekly training in technical skills.

Cumulative GPA (Up to 3rd semester) : 3.65/4.0

Relevant coursework: Machine Learning, Computer Vision, Natural Language Processing, Software Engineering, Database Technology, and Human-Computer Interaction.

Jakarta, Indonesia

September 2024 - Present

WORK EXPERIENCE

BINUS IT Division

Jakarta, Indonesia

March 2026 - present

- **Junior Programmer**

- Collaborated with the team to analyze requirements and implement technical solutions.
- Participate in daily team activities, development planning, technical discussions, and delivering features to production.

- **Associate Programmer**

March 2025 - February 2026

- Developed and maintained internal web applications for BINUS.
- Participated in debugging, optimization, and feature enhancements for existing systems.

OTHER EXPERIENCE

Developing Community Website

Jakarta, Indonesia

Project Leader

August 2025 - October 2025

- *Led the development of a community website for RW08 Sukabumi Utara to improve community information and communication.*
- *Worked directly with users to gather requirements and ensure the final product met their needs.*
- *Coordinated the project from initial planning through development and deployment, including task assignment and team coordination.*

Selected Project

LLM Inference Engine

- *Developed an LLM inference engine from scratch in C with Vulkan, focusing on efficient model inference and GPU computation.*
- *Built a React/Vite web interface to control and interact with the inference engine.*

Personal Cloud System

- *Developed a self-hosted cloud storage system using Next.js, Go, and PostgreSQL, with support for large-file uploads and downloads.*
- *Deployed and maintained the system on a personal Debian server, managing the application and database infrastructure.*

Custom Game Engine

- *Designed and developed a custom game engine from scratch in C using SDL3 as the underlying platform and multimedia layer.*
- *Implemented the engine architecture and core systems, with a custom game built on top of it to demonstrate its capabilities.*

ADDITIONAL

- Technical Skills
 - Language: C, C++, C#, Python, Java, JavaScript, SQL
 - Frameworks & Technologies: React, Next.js, Go, PostgreSQL, Vulkan, SDL3
 - Tools & Platforms: Git, GitHub, Linux, Google Colab, VS Code
- Languages
 - Indonesian (Native)
 - English (Professional Working Proficiency)
